

Making Dreams Come True for Maine Kids During Covid-19!

The dreams detailed below are just a few of the dreams that we were able to grant in 2021. While health conditions made travel dreams impossible, we were able to still grant 12 dreams over these trying times. Below are listed 3 of these dreams.

Scott is a 16 year old boy from central Maine who suffers from a rare digestive tract disease. He is a huge Harry Potter fan and was scheduled to travel to Orlando to visit The Wizarding World of Harry Potter when covid-19 struck.

Scott was unable to travel so his second choice was for a gaming computer. We were able to deliver his gaming computer with every feature he requested and with a decidedly Harry Potter theme.

David is a 16 year old from Bangor who suffers from Spina Bifida. His dream was to go on a deep sea fishing expedition in Florida. Again, due to a compromised immune system, travel was not an option for him.

We were able to provide a New England patriot themed cake (he's a huge fan) and an Olive Garden lunch as we delivered his \$2,500.00 gift card for an on-line shopping spree!

Emma is a 17 year old girl from Windsor who suffers with a rare connective tissue disorder. Emma's initial dream request was a trip to Disney World in Florida, but again the pandemic put that dream on hold.

However, Emma is a huge fan of Halloween, so she and her family spent Halloween week in a haunted castle where they spent their time hiding from ghosts and goblins. Best Halloween ever was Emma's verdict!
